Summary

Professional front end web developer / web application developer with about 10 years of experience. I have had the opportunity to work with very small local companies to start ups to very large international companies.

I have continually worked on multiple projects with varying timelines and objectives concurrently. While maintaining communication as well as meeting deadlines.

I am highly driven and forever curious developer, constantly pursuing information related to our field to continue to push the boundaries and breathe life into projects.

I am a stickler for details and write 100% valid markup. I do not simply use Javascript, jQuery, PHP I actually author my own classes, function and libraries when needed.

I have located to Ankara Turkey and am seeking an energetic, positive position with a local advertising agency or development firm in Germany.

Experience

Mega Hafıza Web Developer

04 / 2014 - 07 / 2015

My day to day activities include developing websites, landing pages and internal applications using technology like HTML5, CSS3, JS, AJAX, SASS and GitHub as well as maintaining existing client websites. This include writing custom modules & bug fixes for numerous CMS systems including Joomla, Word Press and more. I also work with our strategists on various technologies and implementation strategies for our varying projects to help ensure a successful launch.
