

Job Title: Middleware Applications Engineer, DevOps

Location: Rockville, MD

Position Summary / Job Responsibilities:

Aurotech is looking for a passionate and senior level middleware engineer to work closely with the DevOps/ Automated Applications Deployment Team. The resource will build and support application deployment scripts to deploy the Weblogic /OAS 10G application artifacts and other configuration files using scripts such as WLST/Python/Ruby through Puppet/MCollective agents, while also performing day to day WebLogic applications administrator tasks.

The position requires to collaboratively work with enterprise level application teams to take ownership of components and functionality implementation in all tiers. As a WebLogic Engineer, you will be responsible for the development, deployment, support and maintenance of enterprise level applications and services that handle all types of transactions.

Required Technical Skills:

Ideal candidate should be self motivated and must have following skill set:

- 7-10 years of experience in supporting application deployment & troubleshooting J2EE applications
- Extensive experience in administration, monitoring, troubleshooting and maintenance of WebLogic and OAS Servers.
- Experience in all aspects of administration tasks such as day-to-day site monitoring and maintenance, Installation, Configuration, Clustering, Deploying Applications on various operating systems such as UNIX, Linux, and Windows.
- Expertise in installation, configuring and managing WebLogic and Oracle Application Servers (OAS)
- Proficient in deployment and troubleshooting of JAR, WAR and EAR files in domain and clustered environments of WebLogic server
- Experience on WLST and Python/Jython scripts development
- Expertise in analyzing the log files and troubleshooting and fixing of problems in WebLogic Application Server
- Deploying Distributed Applications (WebLogic clustering, network load balancers, DB connections multi-pools, etc.)
- Experience with Configuration management, PKI, SSL Web Services and Fusion Middleware components such as SOA suite and PORTAL Suite
- Experience with Oracle Single Sign-on (SSO), Oracle Internet Directory(OID), Oracle Identity Management, Oracle Grid Control , Oracle SOA Suite

Preferred Skills:

- BS degree in computer science or related field
- Experience with IT automation tools like Chef, Puppet, CFEngine, etc.
- Experience/Knowledge of using variety of open source infrastructure automation tools
- Strong team player, excellent written and oral communication skills
- Leverage structured problem solving skills to coordinate multi-disciplinary problem resolution
- Collaborate with peers and release management team in adjacent organizations to define the engineering roadmap and processes.
- Performs with minimal supervision, works well independently. Ability to operate as independently or as part of collaborative effort.
- Industry standard certifications (WebLogic/OAS) a big plus
