Profile

Lieuwe is an all-round IT consultant who has seen the dynamics surrounding IT solutions from all sides of the table. After finishing his bachelor in Management, Economics and Law he discovered he was above average in learning computer languages and coming up with and building solutions in software regarding his working processes.

In the past eight years, he has had the following roles regarding designing and building software solutions:
•   (WBSO) advisor;
•   Teamleader;
•   Functional designer;
•   Technical designer;
•   Consultant for clients;
•   Software engineer;
•   Freelance contractor;
•   Client.

By gaining experience in all these roles, he is ideally someone who can translate the costumers needs into IT solutions regarding the complete process during the build of software.

Lieuwe is a dedicated professional. He can be deployed as a consultant, functional designer, and project manager. Lieuwe is very involved in project on which he gets deployed. He prefers to take part in a project from the analysis of the issues to the implementation of the (IT)solution.

Both on the analytical level and the communicative level, Lieuwe is very strong. Through is analytical skills he is ideally suited for complex tasks. Formulating strategies and advising clients whilst managing great client relations can be safely entrusted to him.

Lieuwe is a people's person. He knows how to quickly adapt to the language of non IT clients and users, which bridges the gap between business and IT. He is highly appreciated by users and project colleagues.

Lieuwe thinks face-to-face contact with all involved in a project is of great importance. Therefore, he is very willing to travel to clients. He has a positive, solution-oriented attitude, is enthusiastic, creative person with a good sense of humor.
