JOHN SALAVERIA

Front-end Developer | UI Designer
jj.salaveria@gmail.com | johnsington.me | github.com/johnsington

SKILL SET

Languages - JavaScript/CoffeeScript, C++, C, Visual Basic
Tech - NodeJS, Express, MongoDB, Backbone, jQuery, AJAX, MVC, Git, Bash scripting
Markup - HTML5, CSS3, SASS/LESS, Jade, Handlebars, Markdown
Design - Photoshop, Illustrator, InDesign, Flash Professional

WORK

Monstercat, Full Stack Engineer — Aug - Dec 2015
- Developed an internal Slack application that enabled non-technical employees to query and export MongoDB data into a human-readable format.
- Launched a Node client-server web app for an art contest in one week.
- Took full ownership of redesigning monstercat.com UI components from producing mockups to HTML prototyping to technical implementation.

Klick Health, Front End Web Developer — Jan - Apr 2015
- Implemented HTML email campaigns with extensive cross-browser compatibility to reach thousands of pharmaceutical consumers.
- Translated complex design wireframes into pixel-perfect HTML markup for an iPad presentation app to be used in healthcare marketing.
- Worked on the front-end development of the Ampyra.com MVC website redesign.

Canadian Imperial Bank of Commerce, Test Analyst — May - Aug 2014
- Responsible for executing manual tests to assure the quality of CIBC's retail banking website and mobile applications used by millions of clients.
- Developed strong analytical skills from raising and monitoring software defects.

SIDE PROJECTS

johnsington.me — Winter 2015
Redesigned my personal website with a Jekyll-like build framework to feature responsive design and animations using HTML5, SASS, and jQuery.

#instakarma — Winter 2015
Designed and developed a responsive web app that leverages the Instagram API and AJAX methods to count the total likes of a user's most recent photos.
